Management at SNU

The School of Management and Entrepreneurship (SME) at Shiv Nadar University was established in 2014 with the goal of developing into a premier business school ... *located in India but serving the world*. It has been built painstakingly from the ground up – recruiting both established and high potential faculty from top educational institutions; investing in the latest educational technology and infrastructure such as financial trading, innovation prototyping and ‘digital experience’ labs; and establishing a deep *student-centric* foundation for advanced experiential learning, incubation and entrepreneurship. SME currently offers a flagship *IGlobal* MBA and a Bachelor of Management Studies (BMS) program. Given its association with Babson College, recently rated as the #1 entrepreneurship program in the world, SME has a special focus on entrepreneurial leadership in both programs including opportunities to spend a semester at its overseas partner campuses.

The Undergraduate Major in Management Studies

The Bachelor of Management Studies (BMS) has been developed as a unique offering in India. It will provide its selected cohort of students with a strong foundation of specialized knowledge, experiential learning and opportunities for early global exposure. It is aimed at producing well rounded global citizens who have a broad multidisciplinary base of knowledge and a ‘world view’ – Shiv Nadar University’s special differentiator- along with depth and specialization in several job-oriented and ‘in-demand’ areas in Management. The goal is to give students the best of both worlds – versatility that prepares them for any career, including higher education and targeted acceleration into chosen career tracks.

Program structure

BMS Program at SNU gives an opportunity to students to pursue their interest in the specific area of management that they have a flair for. The program has lesser credits on core courses, and more on elective courses. Every student has to take 34 core credits, and 42 departmental elective credits. The students can start taking elective courses from the very first year of undergraduate studies as long as pre-requisites, if any, are met by the students. In addition to departmental core and electives, a student has to satisfy the university requirements of 42 credits combining University-wide Electives (UWE) and Core Common Curriculum (CCC) with a minimum of 18 credits of each type. Depending on aptitude and interest, a student may specialize in one or two managerial areas, say in Marketing and Finance; or Information Systems and Finance (and so on). Different specialization areas are Strategic Management, Entrepreneurship and International Business; Decision Sciences and Operations Management; Economics and Public Policy; Organizational Behavior and Human Resources; Marketing; Finance, Accounting and Control. Every student has to complete either a social sector internship or undergraduate dissertation (6 credits), *and* a business sector internship (6 credits). The total credit requirements for BMS is 130, and the minimum duration for the program is 3 years, and maximum duration is 6 years.

**Major in Management Studies | Coursework and Credits Overview:
An example**

Courses	Year/s	Credits
Core Courses in Management Studies: Foundation Courses <i>The foundational courses aims to build the basic understanding of the theories and practice of management</i>	Years 1, 2 & 3	34 Credits
