

Shiv Nadar Institution of Eminence

Water reuse measurement

Shiv Nadar Institution of Eminence has a robust water reuse measurement process.

- Water being treated is measured, and records are maintained.
- The treated water is used for irrigation and stored in the artificial lake created for the purpose.
- A part of the treated water is also directly supplied for domestic use in washrooms and for the cleaning activities
- Treated wastewater is reused for horticulture purposes through tanks and pipes for irrigation
- Measurement of reused water is done by recording the number of tanks sent for horticulture purposes and the amount of water being sent through pipes.
